Interlibrary Loan

- Interlibrary Loan services are provided for students, faculty and staff.
- Requests can be submitted in person, by using our online web form or simply by emailing us the citations from the database.
- Blake Library makes use of a variety of methods to request/retrieve the article. Ariel allows us to transmit the request electronically and to actually receive the article electronically.

Serials

The Library currently subscribes to 368 titles, 50 of those titles are in the field of Forestry or related fields. Attached you will find a list of our current holdings, this list contains current titles we subscribe to as well as, holdings for titles we no longer subscribe. In addition to the titles held locally in paper format, many of the databases to which we subscribe provide full-text access to a number of additional titles.

Acquisitions

Forestry and Related Areas of Study

	Books	Journals	Microfilm	Videos	Total
FY01	\$540.38	\$5,215.23	\$403.46	\$645.94	\$6,805.01
FY02	\$463.81	\$4,931.69	\$442.91	\$263.89	\$6,102.30

In FY01 14% of the Library's Acquisitions Budget was spent in the Science area. Two other divisions higher were the Social Sciences at 20% and Education at 15%. Following areas were Nursing at 14% and then Humanities at 13%.

In FY02, the numbers were slightly different with 18% spent in the Social Sciences, 14% in Humanities, 14% in Nursing, 13% in Sciences, and 11% in Education.

Databases

Students have access to:

- Academic Search Premier - Provides full text for nearly 3,300 scholarly publications of which 2,400 are peer reviewed. Academic areas of study include: social sciences, humanities, education, computer sciences, engineering, language and linguistics, arts & literature, medical sciences, and ethnic studies.
- Agricola - Index to materials acquired by the National Agricultural Library and co-operating institutions. Includes journal articles, monographs, series, and materials in many non-print formats covering a broad range of agricultural topics including forestry. 1979-1985 international in scope. 1985+ focuses on U.S. related publications
- Agricultural Statistics - Statistical compendium issued yearly by the U.S. Department of Agriculture, covering agricultural production, supplies, consumption, facilities, costs, and returns.
- BIOSIS Previews- Worldwide in scope, BIOSIS Previews, the premier database in the biological sciences, indexes the literature of the biological and biomedical

- sciences. Subject coverage includes agriculture, biochemistry, bioengineering, botany, ecology, forestry, genetics, microbiology, pharmacology, and zoology. Approximately 5,500 serial publications as well as books, proceedings and meeting abstracts, technical reports, review papers, and patents are indexed. There are 58 separate data fields that can be searched including author, title, publication source, organism, concepts, super taxa, publication type, author affiliation, and abstract keyword. Searches can be limited to review articles. Updated weekly
- GeoRef Preview Database - This database contains references that are being prepared for addition to the GeoRef database, one of the premier geological literature databases. Once a record has been added to GeoRef, the record is purged from this database. GeoRef Preview by Subject is divided into 17 areas of the geological sciences. Each area can be browsed. The database also supports key word searching, which includes author names. There are no abstracts in this database. Updated weekly.
 - Ingenta - Index to the tables of contents of 17,000 English language periodicals. Covers all disciplines. Updated daily.
 - ScienceDirect - The premier Web information source for the world's scientific, technical and medical research. ScienceDirect offers access to over 1,200 journals, and navigation across 30 millions records with links to 10,000 journal titles - covering all fields of science, including forestry.
 - Spatial Odyssey - Index to the full text of GIS conference proceeding articles contributed by leading professional organizations; developed by Fogler Library and the National Center for Geographic Information and Analysis.
 - Zoological Record - Worldwide in coverage, Zoological Record indexes the complete range of zoological subjects including animal behavior, genetics, parasitology, ecology, habitat, reproduction, zoogeography, evolution, nutrition, and taxonomy. It is a comprehensive resource for taxonomy. Approximately 6,000 serial publications, a broad range of monograph titles, proceedings volumes, and reports are indexed with approximately 72,000 entries added per year. Searching is by author, title, publication source, subject, geographic location, taxonomic nomenclature. Although abstracts are not included, detailed indexing is present for each entry, with a focus on systematics. Zoological Record searchers should rely on the detailed subject and systematic thesauri for effective searching. Updated monthly.

URSUS

- URSUS is the shared catalog of the University of Maine System, Bangor Public Library, Maine State Library, Maine State Law and Legislative Reference Library
- Students can request materials from participating libraries online through the requestor function.
- There are online tutorials for URSUS - http://www.learn.maine.edu/ocls/tutorials/Finding_Books_URSUS.html
- There is a FAQ/HELP page - <http://130.111.64.3/screens/faq.html>
- Students can view their patron records through URSUS and renew their materials online
- Students can access course reserves through URSUS, searching by faculty name or course

- One to one walk-in reference instruction
- Scheduled group instruction sessions
- “Live Reference Service” - This service is similar to a chat session which allows a patron and librarian to talk live. Live mode is especially helpful to patrons who wish to get instruction on how to use a service and only have one telephone line. We are able to instruct the patron while he/she is still connected to the Internet.
- Email - This service allows patrons to send us their question via email. The patron will receive a reply within 24 hours (unless sent on Friday evening or on a holiday). If the patron does not receive a reply, this usually means we did not receive the email. This service is helpful to patrons when the live mode is unavailable or if the question is a more lengthy research question. A reply may only acknowledge receipt of the email. A full answer to the question may come later.

Library Web Page (<http://www.umfk.maine.edu/infoserv/library/>)

In addition to links to the online catalog and the indexes and databases the library web page includes:

- Citation Guides - Various citation guides starting with the APA style.
- Evaluating Web pages
- Free Access to Online Databases for Maine Citizens and Libraries
- Mariner Tutorials- here you can go to learn more about using URSUS, Indexes & Databases, Interlibrary Loans, and how to do research in general.
- Serials search by subject area
- Subject Bibliographies
- Subject Guides
- Forms Online
- Distance Learning

Electronic Reserves

Faculty can place articles on electronic reserves. Students can access course materials directly through Docutek or through URSUS. Courses are passworded for copyright and uploaded as pdf (portable document file) files.

NetLibrary

A collection of 7,400 e-books (3,400 copyrighted titles and 4,000 in the public domain). Although access to the public domain titles is unrestricted, users must create a personal account in order to check-out copyrighted titles and in order to access these titles from outside the recognized range of IP addresses, such as from AOL or other commercial internet service providers. The check out period is 4 hours and can be repeated.

The following is the number of e-titles by subject which students have access through NetLibrary.

Maine InfoNet

The Maine Info Net Statewide Catalog combines and links library collections. When the system has reached design size, a single search will scan 10,000,000 items in more than 300 libraries. A built-in requesting and transaction management system allows patrons of libraries using a qualifying online system to make online interlibrary loan requests.

With Maine InfoNet students can electronically view and request materials from a number of additional libraries through out the state. Some of these libraries include: Bates, Bowdoin, Colby, Husson, the University of New England, and Minerva a consortial online catalog of 39 public, school, college, and special libraries.

Courier Service

- The UMaine Library System has a two year contract with a statewide courier service for transportation of library materials.
- Daily pick-up and delivery.
