Formulas

The formulas below are ones used this year and may be used again the following years.

- **% increase or decrease**:
  - new number – old number / old number x 100 = Answer

- **Weighted average (used for adding two web site views)**:
  - (1st site) # views x avg. time viewed (or avg. % viewed)
  - +
  - (2nd site) # views x avg. time viewed (or avg. % viewed)
  - /
  - total # of views = Answer
