General Statistics

The Visits graph displays the overall number of visits to your Web site. The General Statistics table provides an overview of the activity for your Web site during the specified time frame.

General Statistics - Report Range: 04/30/2004 00:00:00 - 04/30/2005 23:59:59		
Hits	Entire Site (Successful)	106,288
	Average per Day	290
	Home Page	15,778
Page Views	Page Views	65,114
	Average per Day	177
	Average per Unique Visitor	8
	Document Views	51,934
Visits	Visits	21,490
	Average per Day	58
	Average Visit Length	00:06:24
	Median Visit Length	00:00:04
	International Visits	16.80%
	Visits of Unknown Origin	0.00%
	Visits from United States	83.19%
	Visits Referred by Search Engines	0
	Visits from Spiders	7,450
Visitors	Unique Visitors	7,384
	Visitors Who Visited Once	5,318
	Visitors Who Visited More Than Once	2,066

General Statistics - Help Card	
? Average Hits per Day	- Number of successful hits divided by the total number of days in the log.
Average Page Views per Day	- Number of page views divided by the total number of days in the log.
Average Page Views per Unique Visitor	- Number of page views divided by the total number of unique visitors.
Average Visits per Day	- Number of visits divided by the total number of days in the log.
Average Visit Length	- Average of non-zero length visits in the log.
Document Views	- Number of hits to pages that are considered documents--not dynamic pages or forms--as defined by the system administrator.

General Statistics - Help Card

Hit - A single action on the Web server as it appears in the log file. A visitor downloading a single file is logged as a single hit, while a visitor requesting a Web page including two images registers as three hits on the server; one hit is the request for the .html page, and two additional hits are requests for the downloaded image files. While the volume of hits is an indicator of Web server traffic, it is not an accurate reflection of how many pages are being looked at.

Hits: Entire Site (Successful) - Number of hits that had a "success" status code.

Hits: Home Page - Number of times the home page (as defined in the profile) was viewed.

International Visits - Percentage of visitors defined as "international" in Domain Options.

Home Page Hits - Number of times your home page was visited.

Median Visit Length - Median of non-zero length visits in the log. Half the visit lengths are longer than the median, and half are shorter. This number is often closer to the "typical" visit length than the average visit length. Numbers that are wildly atypical can skew the average, but will not skew the median so much.

Page - Any document, dynamic page, or form. Documents are user-defined in Options, but typically include all static content, such as complete html pages. Dynamic pages are created with variables and do not exist anywhere in a static form. Forms are scripted pages which get information from a visitor and pass it back to the server.

Page Views - Hits to files designated as pages. Supporting graphics and other non-page files are not counted.

Page Views: Document Views - Hits to pages that are defined as documents. This entry excludes hits to dynamic pages and forms.

Unique Visitors - Individuals who visited your site during the report period. If someone visits more than once, they are counted only the first time they visit.

Visits - Number of times a visitor came to your site. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site after they reach the idle-time limit, a new visit is counted. The default idle-time limit is thirty minutes.

Visits from Spiders - Number of visits from any site classified as a spider.

Visits from Your Country - Percentage of visits from your country. The name of your country and the country code are shown. Your system administrator configures the selection for your country.

Visits of Unknown Origin - Percentage of visitors from an origin that could not be determined.

Visits Referred by Search Engines - Number of visits that began with a referral from any site classified as a search engine.

Visitors Who Visited More Than Once - Number of individual visitors who appear more than once in the log file. Individuals can be tracked by IP addresses, domain names, and cookies. Cookies provide the most accurate count.

Visitors Who Visited Once - Number of individual visitors who appear only once in the log file. Individuals can be tracked by IP addresses, domain names, and cookies. Cookies provide the most accurate count.

The General Statistics page provides an overview of your Web site's performance and visitor behavior and can help you determine which chapters will be most valuable to you.

Top Pages

This page identifies the most popular Web pages on your site, shows you how often they were viewed, and displays the average length of time the page was viewed.

Top Pages - Help Card
<p>? Average Time Viewed - Average length of time the specified page was viewed.</p> <p>Pages - Specific page being analyzed. If the page has a formal title, you will see the title of the page and the URL. Otherwise, you will only see the URL.</p> <p>Subtotal - Sum of all data rows for each listed page.</p> <p>Total - Sum of the subtotal and all data that does not appear on the page.</p> <p>Views - Number of times the specified page was viewed by a visitor. Each page can be viewed more than once by the same visitor, and each view is counted. If you want to ignore repeated page views by the same visitor, look in the Visits column.</p>

Top Pages - Help Card

Visits - Number of visits that include a view of the specified page. Individual visitors are counted each time they come to the Web site, and are counted only once per visit no matter how many pages they look at. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site after they reach the idle-time limit, a new visit is counted.

% - Percentage of visitors who viewed the specified page.

 Pages with good content and design are more likely to attract visitors and be revisited. Less popular pages on a site can be made more appealing by improving the content or incorporating design elements similar to that on the more important pages. Always remember that people are far more interested in content than in design, and average view times can help determine which content is most important to your visitors.

Top Documents

This page identifies the most popular documents on your site, shows you how often they were viewed, and displays the average length of time the page was viewed.

Top Entry Pages - Help Card

 **Entry Page** - The first page a visitor sees when entering your Web site. To qualify as an entry page the visit must start with a valid page type. If a session starts at a file with a different type (such as a graphic or sound file), the file does not count as an entry page, and the session is not included in the total. Such sessions are often the result of other sites referencing a specific downloadable file or graphic on your site. In these cases, a session may have a single hit to a non-page file, and will not be counted. Also, Web servers do not always log hits in perfect chronological order. For example, a hit to a GIF file can appear in the log before the hit to the HTML page that refers to this GIF.

Page - Specific page being analyzed. If the page has a formal title, you will see the title of the page and the URL. Otherwise, you will only see the URL.

Visits - Number of times the specified page was the entry page. Individual visitors are counted each time they come to the Web site. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site after they reach the idle-time limit, a new visit is counted. The default idle-time limit is thirty minutes.

% - Percentage of times this page was the entry page compared with other entry pages.

 This information can indicate how you might want to optimize the architecture of your Web site based on where your visitors are entering. It can also help you determine which external links are most effective. Consider updating meta-tags and links.

Top Entry Files

This page identifies the first hit from a visitor visiting your site. This is most likely the home page but, in some cases it may also be specific URLs that go directly to a particular file or page.

	cfm		
Total For the Pages Above (only visits starting on a valid document type are included)		64.12%	12,558

Top Exit Pages - Help Card

 **Exit Page** - The last page a visitor views before leaving your Web site. To qualify as an exit page the visit must end with a valid page type. If a session ends on a page with a different type (such as a graphic or sound file), the file does not count as an exit page, and the session is not included in the total. Such sessions are often the result of other sites referencing a specific downloadable file or graphic on your site. In these cases, a session may have a single hit to a non-page file, and will not be counted.

Pages - Specific page being analyzed. If the page has a formal title, you will see the title of the page as well as the URL. Otherwise, you will only see the URL.

Visits - Number of times the specified page was the exit page. Individual visitors are counted each time they come to the Web site. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site after they reach the idle-time limit, a new visit is counted. The default idle-time limit is thirty minutes.

% - Percentage of times this page was the exit page compared with other exit pages.

 You can use this information to determine your visitors' satisfaction with their visits. Visitors may have left after viewing a specific page because they found what they were looking for, lost interest, determined the content didn't apply to them, or for many other reasons. If your top exit page is your home page, this may be an indication that you are alienating a lot of first-time visitors.

Single Access Pages

This page identifies the pages on your Web site that visitors open, then exit from, without viewing any other page.

Single Access Pages - Help Card

? Single Access Page - A page on your Web site that visitors open, then exit from, without viewing any other page. To qualify the visit must be to a page that is a valid page type. If the visit is to a file of a different type (such as a graphic or sound file), the file does not count as a single access page, and the visit is not included in the total. Such visits are often the result of other sites referencing a specific downloadable file or graphic on your site. In these cases, a visit may be a single hit to a non-page file, and will not be counted.

Pages - Specific page being analyzed. If the page has a formal title, you will see the title of the page as well as the URL. Otherwise, you will see only the URL.

Visits - Number of times the specified page was a single access page. Individual visitors are counted each time they come to the Web site. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site after they reach the idle-time limit, a new visit is counted. The default idle-time limit is thirty minutes.

% - Percentage of times this page was a single access page compared with other single access pages.

💡 This information can be helpful when considering the design of the site with respect to the kind of visitors you attract. Consider how well these pages convey your message. Do they need improvement to extend visits, or is it possible that are you attracting the wrong visitors?

Top Directories

This page lists the most common directories accessed by visitors to your Web site. This information can help determine the types of data most often requested.

Top Directories - Help Card

? Hits - Number of hits to files within the specified directory. A hit is a single action on the Web server as it appears in the log file. A visitor downloading a single file is logged as a single hit, while a visitor requesting a Web page including two images registers as three hits on the server; one hit is the request for the .html page, and two additional hits are requests for the downloaded image files. While the volume of hits is an indicator of Web server traffic, it is not an accurate reflection of how many pages are being

Top Directories - Help Card

looked at.

Non-cached Bytes - Number of non-cached bytes of data transferred.

Non-cached % - Percentage of hits that were not already in the visitor's browser cache.

Path to Directory - The full URL path to the directory being analyzed.

Visits - Number of visits to pages within the specified directory. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site after they reach the idle-time limit, a new visit is counted. The default idle-time limit is thirty minutes.

% of Total Hits - Percentage of hits to the specified directory out of hits to all directories.

These trends indicate the content visitors are most interested in. Use this information to determine which content areas to develop further, which areas to focus on less, and how you can arrange your content most effectively.

Top Visitors - Help Card

? Hits - Number of hits from the specified visitor. A hit is a single action on the Web server as it appears in the log file. A visitor downloading a single file is logged as a single hit, while a visitor requesting a Web page including two images registers as three hits on the server; one hit is the request for the .html page, and two additional hits are requests for the downloaded image files. While the volume of hits is an indicator of Web server traffic, it is not an accurate reflection of how many pages are being looked at.

Visitor - If cookies are enabled, this column will display the cookie from the specified visitor. If cookies are not enabled, and the IP address of the visitor can be resolved, this column will display the resolved IP address of the specified visitor. Otherwise, this column will display the non-resolved IP address of the visitor.

Visits - Number of times the specified visitor visited your Web site.

% - Percentage of hits from the specified visitor.

 Use this information to find out which individuals visit your site the most and how frequently they visit.

Top Geographic Regions

This page identifies the top locations of the visitors to your site by geographic region.

Top Geographic Regions		
	Geographic Regions	Visits ▼
1	North America	19,165
2	Asia	1,162
3	Western Europe	651
4	Northern Europe	177
5	Eastern Europe	106
6	South America	52
7	Australia	50
8	Middle East	45
9	Western Africa	22
10	Northern Africa	20
11	Caribbean Islands	12
12	Southern Africa	12
13	Region Not Found	9
14	Pacific Islands	4
15	Eastern Africa	3
Total for the Geographic Regions above		21,490

Top Geographic Regions - Help Card	
?	<p>Geographic Regions - The geographic part of the world where visitors to your web site are located. Two methods exist for identifying the location of a visitor:</p> <p>WebTrends GeoTrends Database - If GeoTrends is enabled for this profile, the region is determined by searching for a visitor's IP address in this database.</p> <p>Domain Name - The region can be determined by the domain name. The domain name can be identified if it was logged by the web server or, if it is defined in the Internet Domain Name System, then it may be found using DNS resolution based on the IP address.</p> <p>Region Not Found - Using GeoTrends, this entry appears when an IP address can not be found in the GeoTrends database.</p> <p>Region Unspecified - This entry appears when a country code could not be found in region.ini, or when neither GeoTrends nor DNS are enabled, or when DNS is enabled without GeoTrends and a visitor's domain name could not be found.</p> <p>Visits - Number of visits from the specified geographic region. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site after they reach the idle-time limit, a new visit is counted. The default idle-time limit is thirty minutes.</p>

Most Active Countries

This page identifies the countries with your most active visitors.

Most Active Countries		
	Countries	Visits ▼
1	United States	17,878

Total for the Log File		106,288	100%	21,490

Most Active Organizations - Help Card

? Hits - Number of hits to your site from the specified organization. A hit refers to a single action on the Web server as it appears in the log file. A visitor downloading a single file is logged as a single hit, while a visitor requesting a Web page including two images registers as three hits on the server; one hit is the request for the .html page, and the two additional hits are requests for the downloaded image files. While the volume of hits is an indicator of Web server traffic, it is not an accurate reflection of how many pages are being looked at.

Organizations - If GeoTrends is enabled, the name of the company or organization is found by looking up the visitor's IP address in the GeoTrends database. If DNS domain name resolution is enabled and the domain name for this IP address is found, the domain name will be shown. If neither GeoTrends nor DNS resolution is enabled, only IP addresses are shown.

Subtotal - Sum of all data rows for each listed organization.

Total - Sum of the subtotal and all data that does not appear on the page.

Visits - Number of visits to your site from the specified organization. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site after they reach the idle-time limit, a new visit is counted. The default idle-time limit is thirty minutes.

% - Percentage of total hits from a visitor inside the specified organization.

💡 Determine how your Web site can be improved according to how businesses use your site. Consider how your product can be made more attractive to organizations that have shown interest.

Top-Level Domain Types

This section provides a breakdown by types of top-level domains (Commercial, Organization, Educational, etc.). This information can only be displayed if reverse DNS lookups have been performed, and the percentages refer to the total of hits for which the organization type can be determined (some IP addresses cannot be resolved to a domain, and therefore an organization type cannot be determined).

Top-Level Domain Types				
	Top-Level Domain Type	Hits	% of Total Hits	Visits ▼
■ 1	Commercial	24,678	33.88%	8,497
■ 2	Network	41,213	56.58%	3,752
■ 3	Education	5,842	8.02%	710
■ 4	Organization	780	1.07%	91
■ 5	Government	171	0.23%	27
■ 6	Military	146	0.20%	25
■ 7	International	2	0.00%	1
Total for Known Top-Level Domain Types		72,832	100.00%	13,103

Top-Level Domain Types - Help Card

? Hits - Number of hits from a visitor with the specified top-level domain type. A hit is a single action on the Web server as it appears in the log file. A visitor downloading a single file is logged as a single hit, while a visitor requesting a Web page including two images registers as three hits on the server; one hit is the request for the .html page, and two additional hits are requests for the downloaded image files. While the volume of hits is an indicator of Web server traffic, it is not an accurate reflection of how many pages are being looked at.

Top-Level Domain Type - The type of organization, determined by the top-level domain (the three-digit suffix of the URL). Possible suffixes and types include the following:

.com = Commercial
 .edu = Educational
 .int = International
 .gov = Government
 .mil = Military
 .net = Network
 .org = Organization

Visits - Number of visits to your site from the specified type. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site

Top-Level Domain Types - Help Card

after they reach the idle-time limit, a new visit is counted. The default idle-time limit is thirty minutes.

% - Percentage of total hits from someone from the specified organization type. The percentages refer to the total number of hits for which the organization type can be determined. Some IP addresses cannot be resolved to a domain, and therefore the organization type cannot be determined. This information can be displayed only if DNS resolution is enabled.

Consider what types of organizations are most interested in your site and how you can attract other types.

Summary of Activity for Report Period

This page summarizes general server activity.

Summary of Activity for Report Period	
Average Number of Visits per Day on Weekdays	77
Average Number of Hits per Day on Weekdays	400
Average Number of Visits per Weekend	144
Average Number of Hits per Weekend	640
Most Active Day of the Week	Mon
Least Active Day of the Week	Sat
Most Active Date	March 30, 2005
Number of Hits on Most Active Date	1,440
Least Active Date	April 30, 2004
Number of Hits on Least Active Date	7
Most Active Hour of the Day	13:00-13:59
Least Active Hour of the Day	02:00-02:59

Totals	21,490	100%

Number of Views per Visit - Help Card

? Number of Pages Viewed - The number of pages viewed, beginning with one and increasing by increments of one, being analyzed in the other columns.

Number of Visits - Number of visits by people who viewed the specified number of pages. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site after they reach the idle-time limit, a new visit is counted. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of total visits by people who viewed the specified number of pages.

💡 You can use this information to quickly find out the number and percentages of viewers who read a given number of pages on your site. If most visitors only view a few pages, it may indicate that they cannot find the content they are looking for.

Visitors by Time Increment

This page shows how many visitors viewed your Web site and how long they stayed. The information is split up into time increments based on the duration of the log file. Visitors are typically tracked using the cookie that's been defined or by their IP addresses.

Visitors by Time Increment

Visitors by Time Increment - Help Card

? Visitors - Number of times a visitor came to your site during the specified time frame. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site after they reach the idle-time limit, a new visit is counted. The default idle-time limit is thirty minutes.

Unique Visitors - Individuals who visited your site during the report period. If someone visits more than once, they are counted only the first time they visit.

First Time Visitors - Number of visitors who had never visited your Web site before. You must use a persistent and defined cookies to get this information.

Average Visit Length - Average amount of time a visitor spent at your site within the given time frame. Visit lengths in one time frame are not compared with visit lengths in other time frame.

Visitor-Minutes - Total number of minutes your site was viewed by all visitors during the specified time frame.

Technical Statistics and Analysis

This page shows the reliability of your Web site. The table shows the total number of hits for the site, how many were successful, how many failed, and it calculates the percentage of hits that failed.

Technical Statistics and Analysis	
Total Hits	117,198
Successful Hits	106,288
Failed Hits	10,910
Failed Hits as Percent	9.30%
Redirected Hits	29,512
Redirected Hits as Percent	25.18%
Cached Hits	9,417
Cached Hits as Percent	8.03%

Technical Statistics and Analysis - Help Card

 **Cached Hits** - Hits where the page was found in the cache of the browser, so the server did not need to transfer the file.

Cached Hits as Percent - Percentage of hits that were cached compared with the total number of hits.

Redirected Hits - Number of client requests that were redirected to other resources.

Redirected Hits as Percent - Percentage of client requests that were redirected to other resources.

Failed Hits - Number of hits where a server or client error occurred.

Failed Hits as Percent - Percentage of hits where a server or client error occurred.

Hits - A hit refers to a single action on the Web server as it appears in the log file. A visitor downloading a single file is logged as a single hit, while a visitor requesting a Web page including two images registers as three hits on the server; one hit is the request for the .html page, and two additional hits are requests for the downloaded image files. While the volume of hits is an indicator of Web server traffic, it is not an accurate reflection of how many pages are being looked at.

Successful Hits - Number of hits without errors. Optionally excludes redirected requests and cached hits.

Total Hits - Number of successful hits plus failed and redirected hits.

 Use this information for a bird's-eye view of the reliability of your Web site. Many major problems can be revealed here.

Top Browsers

This page identifies the most popular browsers used by visitors to your site. This information will only be displayed if your server is logging the browser/platform information.

Top Browsers

	Browser	Hits	% of Total Hits	Visits ▼
1	Microsoft Internet Explorer	71,081	82.64%	8,220
2	Others	6,710	7.80%	1,929
3	Netscape Navigator	6,820	7.92%	840
4	Netscape Compatible	1,257	1.46%	476
5	WebTV	52	0.06%	18
6	Opera	15	0.01%	7
7	Lynx	70	0.08%	2
Total For Browsers Above		86,005	100.00%	11,492

Top Browsers - Help Card

? **Browser** - Identifies each browser used by visitors.

Hits - Number of hits from the specified browser. A hit is a single action on the Web server as it appears in the log file. A visitor downloading a single file is logged as a single hit, while a visitor requesting a Web page including two images registers as three hits on the server; one hit is the request for the .html page, and two additional hits are requests for the downloaded image files. While the volume of hits is an indicator of Web server traffic, it is not an accurate reflection of how many pages are being looked at.

Visits - Number of times a visitor with the specified browser came to your site. Every visit by each individual visitor is counted. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site after they reach the idle-time limit, a new visit is counted. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of total hits by visitors using the specified browser.

💡 Browser data can help you determine how to configure your site for optimal viewing.

Netscape Browsers

This page gives you a breakdown of the various versions of Netscape used by visitors to your site.

Netscape Browsers				
	Browser	Hits	% of Total Hits	Visits ▼
1	Netscape 5.0	3,471	50.89%	510
2	Netscape 7.1	898	13.16%	158
3	Netscape 7.2	409	5.99%	51
4	Netscape 4.08	238	3.48%	42
5	Netscape 7.02	111	1.62%	17
6	Netscape 4.5	21	0.30%	12
7	Netscape 4.7	1,433	21.01%	11
8	Netscape 4.0	51	0.74%	8

16	Netscape 4.75	7	0.10%	1
17	Netscape 4.78	1	0.01%	1
18	Netscape 4.77	7	0.10%	1
19	Netscape 6.2.1	6	0.08%	1
20	Netscape 4.51	1	0.01%	1
Total For Browsers Above		6,809	99.83%	836

Netscape Browsers - Help Card

? **Browser** - Specific version of Netscape being analyzed.

Hits - Number of hits by visitors with the specified version of Netscape. A hit refers to a single action on the Web server as it appears in the log file. A visitor downloading a single file is logged as a single hit, while a visitor requesting a Web page including two images registers as three hits on the server; one hit is the request for the .html page, and the two additional hits are requests for the downloaded image files. While the volume of hits is an indicator of Web server traffic, it is not an accurate reflection of how many pages are being looked at.

Netscape Browsers - Help Card

Visits - Number of visits by visitors with the specified version of Netscape. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site after they reach the idle-time limit, a new visit is counted. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of hits from visitors with the specified version of Netscape.

This determines which percentage of visitors use newer browser versions and whether version-specific features (such as Java Scripts) should be implemented on your site.

Microsoft Explorer Browsers

This page gives you a breakdown of the various versions of Microsoft Internet Explorer used by visitors to your site.

Microsoft Explorer Browsers				
	Browser	Hits	% of Total Hits	Visits ▼
1	Explorer 6.0	64,430	90.64%	7,382
2	Explorer 5.5	3,450	4.85%	328

Total For Spiders Above		17,722	89.01%	7,657

Visiting Spiders - Help Card

? **Hits** - Number of times the specified spider hit your site. A hit refers to a single action on the Web server as it appears in the log file. A visitor downloading a single file is logged as a single hit, while a visitor requesting a Web page including two images registers as three hits on the server; one hit is the request for the .html page, and the two additional hits are requests for the downloaded image files. While the volume

Visiting Spiders - Help Card

of hits is an indicator of Web server traffic, it is not an accurate reflection of how many pages are being looked at.

Spider - An automated program which searches the Internet.

Visits - Number of times the specified spider visited your site.

% - Percentage of total spider hits by the specified spider.

 This information is important for a Webmaster trying to block spiders that tax the server. It also tells you what kind of automated attention you have attracted to your site.

Top Platforms

This page identifies the operating systems most used by the visitors to the site. This information will only be displayed if your server is logging the browser/platform information.

Top Platforms

	Platform	Hits	% of Total Hits	Visits ▼
1	Others	28,345	26.76%	10,328
2	Windows XP	53,311	50.33%	5,888
3	Windows 98	8,163	7.70%	1,113
4	Windows 2000	8,696	8.21%	1,106
5	Windows ME	2,734	2.58%	304
6	Macintosh PowerPC	1,824	1.72%	302
7	Windows NT	2,466	2.32%	94
8	Windows 95	264	0.24%	58
9	Linux	96	0.09%	41
10	Windows Win32s	13	0.01%	8
11	OS/2	1	0.00%	1
Total For Platforms Above		105,913	100.00%	19,243

Top Platforms - Help Card

? Hits - Number of hits by visitors using the specified platform. A hit refers to a single action on the Web server as it appears in the log file. A visitor downloading a single file is logged as a single hit, while a visitor requesting a Web page including two images registers as three hits on the server; one hit is the request for the .html page, and the two additional hits are requests for the downloaded image files. While the volume of hits is an indicator of Web server traffic, it is not an accurate reflection of how many pages are being looked at.

Platform - The specified platform being analyzed. "Platform" refers to the operating system.

Visits - Number of visits by people using the specified platform. If a visitor is idle longer than the idle-time limit, WebTrends assumes the visit was voluntarily terminated. If the visitor continues to browse your site after they reach the idle-time limit, a new visit is counted. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of hits by visitors using the specified platform.
