**Welcome to the quick tutorial on finding "More" filters in OneSearch**
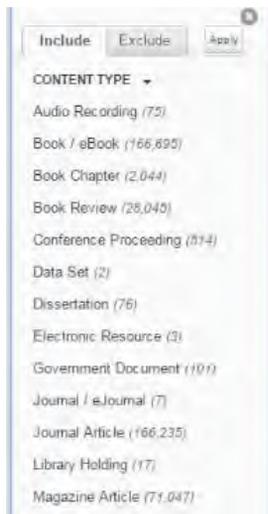

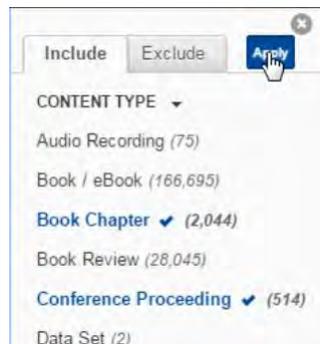

In the previous tutorial we discussed Facets and Filters.

Each Facet has a variety of filters, and if you don't see the filter you want, you can click on the "More…" link at the bottom of the list.
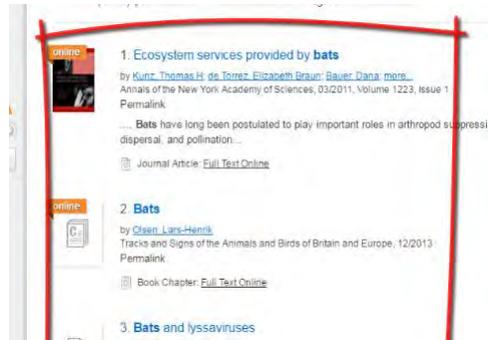

When you do so, a new panel opens up to display many more filters to choose.

When you click on one or more filters, you then click the apply button at the top of the panel.

Your results will then change to reflect the
new filters you put in place.

Make sure to ask for help from library staff at any
time.
